PROJECTS

1.Authentication System (Flask + SQLite)
Signup/Login, session handling, password hashing, alerts, reusable structure

url: https://github.com/Samin-Saikia/Flask-Sign-Up-Login-System

2. Image Resizer & Compressor (Tkinter + Pillow)
Upload → Resize/Compress → Download interface, clean UI.

url: https://github.com/Samin-Saikia/Neat-Image-Resizer

3. Productivity Flow (HTML/CSS/JS)

an integrated, web-based productivity suite that brings together tools like Pomodoro timer, task-manager, notes (including Markdown support), calendar, mind-map, code/text snippet organizer and more

url: https://github.com/Samin-Saikia/ProductivityFlow

4. full-stack Django blog application (HTML/JS +Django+Mariadb(MySQL))
A full-stack Django blog application with authentication, post management, categories, tags, responsive UI, and role-based permissions.

url: https://github.com/Samin-Saikia/full-stack-Django-blog-app

5. e-commerce frontend application
StyleHub Electronics is a visually stunning, fully responsive e-commerce frontend application built to showcase premium frontend development skills. This project demonstrates advanced styling techniques, modern UI/UX principles, and interactive features without any backend dependencies.

url: https://github.com/Samin-Saikia/E-commerce-website

6. Doctor Appointment Booking Backend api

Production-ready Doctor Appointment Booking Backend using Django, DRF & MariaDB with custom admin panel.

url: https://github.com/Samin-Saikia/doctor-appointment-system

7. Portfolio Website

A prortfolio website that represents and showcase my skill learning and works

url : https://github.com/Samin-Saikia/portfolio-website

EDUCATION

Class 11 Science Student
Independent learner focusing on web development and software tools.

SOFT SKILLS

- Clear communication
- Fast learning
- Problem solving
- Reliable delivery
- Clean coding style
